SOLAR AND PRE-PAID METERS

During the past couple of weeks, Tshwane received several calls from residents who had problems loading electricity tokens to pre-paid meters.

On inspection, it was found that the main contributing factor is the properties where solar systems have been installed.

The following guidelines may assist in resolving these issues:

- Where solar has been installed, the pre-paid meter should not be plugged into a power point connected to the solar power.
- The meters must be connected to an Eskom-fed power point.
- Provision for an alternative power point must be provided between the Eskom power point and the solar inverter [directly to Eskom] for the meter to properly communicate with the unit in the meter box.

Regards

CG Groenewald
