RAND WATER SHUTDOWN

Good morning residents,

As Rand Water continues to embark on its maintenance drive, the Mapleton system will be affected with a 30% loss of capacity from Saturday to Monday.

This is a significant amount of water not being pumped into the system.

Every part of ward 101 with piped water will be affected should this drain the reservoir system, namely Bronberg (direct Rand Water) and Mooikloof reservoir (City of Tshwane). As explained before, authorities from both sides will fill up the reservoirs to as much as the current demand allows. Should we face no water, it will take days to refill the system. And by that stage, I will request water tankers at our dedicated spots.

Report any water leaks to the council directly, water your gardens before sunrise and after sunset to avoid too much evaporation, and use water sparingly.

Thank you for paying attention to this matter.
